Wendemachew Tsegaye

Full-Stack JavaScript (MERN Stack) Developer & Digital Marketer

3rd-Year Computer Science Student • Debark University

Location: Debark, Ethiopia **Phone:** +251 903 166 512 **Email:** debuglife1221@gmail.com **GitHub:** github.com/debug-life21

LinkedIn: linkedin.com/in/wendmachew-tsegaye **Portfolio:** Online Portfolio

PROFESSIONAL SUMMARY

Proactive 3rd-year Computer Science undergraduate at Debark University and self-driven Full-Stack JavaScript (MERN) Developer and Digital Marketer. Blends strong academic foundations in algorithms, database design, and software engineering with relentless independent online learning. Adept at architecting end-to-end web applications with MongoDB, Express.js, React, and Node.js, while utilizing search engine optimization (SEO), data analytics, and digital outreach to build high-visibility, user-centric digital products.

TECHNICAL EXPERTISE & STACK

Full-Stack MERN:	React.js, Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, JWT Authentication, JSON, Asynchronous Workflows
Front-End & UI/UX:	JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, DOM Manipulation, Component-Driven Architecture, Micro-animations
Digital Marketing & SEO:	Search Engine Optimization (SEO), Social Media Marketing, Content Strategy, Web Analytics, Conversion Rate Optimization (CRO), Audience Growth Campaigns
Databases & Foundations:	MySQL, Relational Database Modeling, PHP (Basics & CRUD), Data Structures & Algorithms, Object-Oriented Programming (OOP)
Tools & Workflow:	Git, GitHub, VS Code, Postman (API Testing), Vite, npm, Chrome DevTools, Linux/Bash CLI

EDUCATION & ACADEMIC BACKGROUND

Debark University (DKU) — B.Sc. in Computer Science `3rd Year • In Progress` 2023 – Present

Debark, Amhara Region, Ethiopia

- **Core Coursework:** Data Structures & Algorithms, Database Management Systems, Web Programming, Software Engineering, Object-Oriented Programming, Computer Networks, Operating Systems.
- Developing strong analytical problem-solving abilities and practical team collaboration habits through coursework and department projects.

Online Self-Directed Technical Specialization `Independent Learning` 2024 – Present

- Intensive self-guided mastery of modern Full-Stack JavaScript (MERN Stack), reading technical documentation, building end-to-end projects, and practicing modern responsive UI engineering.
- Continuous study of Digital Marketing, search visibility metrics, and growth strategies.

SELECTED ENGINEERING PROJECTS

Smart Café Management System — Full-Stack Web System Academic Project

- Engineered a full-stack database-backed platform to manage cafe orders, dynamic menu items, and daily inventory tracking.
- Designed structured relational database schemas in **MySQL** and built administrative operations in **PHP** and **JavaScript**.
- Implemented responsive front-end forms with clear user navigation and data integrity checks.

Full-Stack MERN Application Hub — Full-Stack Web Application Independent Project

- Architected decoupled web application utilizing **React** for the UI and **Express.js / Node.js** for RESTful API services.
- Configured **MongoDB** with Mongoose for schema modeling, validation, and persistent data operations.
- Integrated token-based authentication (JWT) and modular component architecture styled with **Tailwind CSS**.

Interactive Web Tools (Digital Clock, Student Registration & Calculator) Front-End Projects

- Developed high-precision real-time tools leveraging native **JavaScript ES6+** DOM manipulation and state logic.
- Designed accessible, validated student data collection forms with error prevention and adaptive CSS layouts.

PROFESSIONAL ATTRIBUTES & LANGUAGES

Core Strengths: Fast autonomous learner, analytical troubleshooter, team player, strong technical communicator, detail-oriented coder, growth-oriented mindset.

Languages: Amharic (Native), English (Professional Working Proficiency).
